

MOUNT EBAL AND MOUNT GERIZIM

M

Mount Ebal and Mount Gerizim stand side by side like twin mountains with a V-shaped valley between. They are located almost in the center of the Land of Jesus. Mount Ebal is just a little taller than Gerizim. They are not very high mountains (3000 feet). Still, from the top of either peak you can see most of the Land of Jesus - from Mount Hermon to the hills around Jerusalem. These mountains stand like two guards watching an important mountain pass from the east to the west.
